Welcomed by the instance editor

Welcome to your new Node-RED instance on IBM Cloud

We know you're eager to start wiring up your flows, but first there are a couple of tasks you should do:

- · Secure your Node-RED editor
- · Learn how to install additional nodes

Setting up credentials

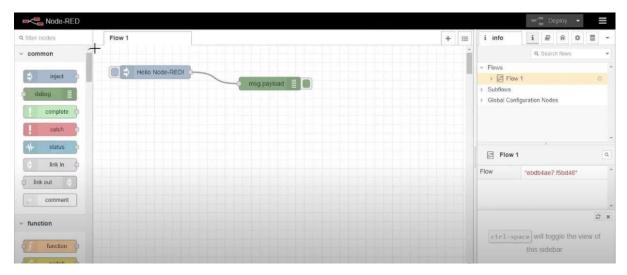

- $\ensuremath{\bigcirc}$ Secure your editor so only authorised users can access it
- Not recommended: Allow anyone to access the editor and make changes

Your editor will not be secured. Anyone with the URL will be able to access your flows, data and bound services.

☑ Tick this box to confirm you want your editor to be insecure

Dragged and dropped components into the editor

•

• Editing some values of the properties

• Successfully deployed the app

Result: Successfully created a NodeRED service on IBM Cloud
